2. Example of basic instructions - Intro to Lightroom

<http://blachedesigns.com/curriculum/Lightroom1PrintFileFall13.pdf>

3. Example of full lesson – Photoshop

The screenshot shows a lesson page for Photoshop. At the top left is a small image of a person on a grassy hill. To the right, the text reads "iBTEach Image Editing 2 with Photoshop Meredith Blache". The main title is "Through the Looking Glass - Creating Portal Images". Below the title is a paragraph: "In this lesson you will learn how to create 'portal' style images. You will use two images: one from behind a glass pane to create an illusion of a portal to another dimension." The "Lesson Objectives" section lists five points: 1. Open images and layers from Bridge or Photoshop; 2. Merge layers to create the top of the looking glass window; 3. Remove pixels around the top edge of the window; 4. Reposition the top edge layer to the bottom; 5. Use the eraser tool to adjust layer opacity; 6. Crop images for composition changes. The "Assignment" section states: "For this assignment you will need to find two images: one image will be of a person looking through the window and the next image is the scene viewed through the person standing there. You will combine these two images to create a portal effect. The final result should be a composite image with the image being 'portaled'." Below the text are two side-by-side images showing a person on a hill, with the right image showing a 'portal' effect where the person appears to be looking through a window into another scene. At the bottom right, it says "Photoshop 2 - Portal Images Page 1".
